

On target

Set clear energy saving objectives

Do you know where, when, and how energy is used on your site? Does your site have an energy team? Come up with lots of ideas to improve overall control of your energy and share with others. Make a plan to save energy. Set yourselves some stretching targets. Celebrate success and learn from mistakes. Do this and you can reduce your site's energy consumption by up to 20%.

Have you got a clear plan to improve energy performance?
