Switch it off

Don't leave equipment on if you're not using it

Electricity consumed at our largest quarries produces 7,000 tonnes of CO_2 per year – that's equivalent to the annual emissions of 2,000 cars. Simple, personal actions such as switching off equipment when not in use can save up to 10% of that energy – as long as we all remember to do it.

Have you turned off everything you've used today?
